SIGNET recognizes that it has a sense of corporate responsibility to the community by donating time and money to worthy charities and by providing a stable source of employment.

With the recent formal publication of SIGNET's Mission Statement and Core Values statement, I have established a three-member Community Service Committee. Kelly Peckham, Renee Thimann and Barbara Caron have all graciously accepted my invitation to a one-year term on this initiative.

The purpose of this committee will be to choose events and charities that will summon the maximum generosity, interest and participation of SIGNET team members, and to track and monitor activity, including community service during business hours, special annual events and year-long campaigns.

SIGNET is funding the committee with an initial \$5000 investment, and in the spirit of this community service initiative, funding will come from the suspension of the Friday fruit platter and monthly Birthday luncheons. If the committee's efforts are successful, I will certainly consider allocating additional funding toward its charitable efforts.

I believe that SIGNET team members are blessed, and that we all have a responsibility to support the community in whatever fashion we are able. I encourage all team members to support the committee by participating and supporting its efforts.

Thank you!
