

FOR IMMEDIATE RELEASE

SIGNET RECEIVES EXCELLENT DCAM EVALUATION ON KEVILLE HOUSE PROJECT

Norwell, MA – SIGNET Electronic Systems, Inc. recently received an excellent score on their DCAM Evaluation for work completed at the Keville House. The Keville house is a dormitory building at the Chelsea Soldiers Home in Chelsea, Massachusetts. The property was in need of a fire alarm system upgrade for the first and second floors to accommodate a complete renovation of those areas. SIGNET successfully secured this work by being the lowest qualified bidder.

SIGNET's project management and installation staff from the beginning instilled confidence in the owner, engineer and architect that the contract was being executed in a professional manner and with a high level of quality in workmanship. With this being said the scope of the project was expanded to include the initiating devices on the third, fourth, fifth and sixth floors.

Then a sprinkler leak occurred that damaged and disabled the existing panel requiring that the fire department start a 24 hour a day fire watch. SIGNET responded by escalating the installation of devices for the third, fourth, fifth and sixth floors. This work was completed in only two days, saving the customer thousands on the cost of a fire watch.

SIGNET would like to thank the following members of the installation team who worked on this project: Foreman Rich Straffin, Technician Lee Curran, and Apprentice Zachary Littlefield.
