SIGNET INSTALLS VIDEO SURVEILLANCE SYSTEM FOR BOSTON POLICE DRUG EVIDENCE DEPOSITORY

NORWELL, MA – January 15, 2008 – SIGNET Electronic Systems, Inc. has completed the installation of a state-of-the-art video surveillance system in the central drug evidence depository of the Boston Police Department.

The security system features 20 cameras providing 24-7 surveillance of the area where drug evidence seized by police is stored. The IP-based system provides redundant coverage to capture images of all activity within the area.

“We're proud to work closely with the Boston Police Department to provide the very best security system to ensure the integrity of evidence seized in criminal investigations,” said Bradford Caron, Executive Vice President of SIGNET Electronic Systems Inc. “The Boston Police relied on SIGNET because of track record of installing and integrating the very latest in security and communications systems for public safety organizations.”

SIGNET, a pre-approved vendor for the Commonwealth of Massachusetts and its municipalities, started the project in late November and finished just over a month later. Further details about the system are not available due to security considerations.

SIGNET has extensive experience with installing security and communications systems at public safety facilities, including the Plymouth Trial Court, the Bridgewater Police Department, and the Eastern Hampshire District Court. SIGNET is currently installing video surveillance, access control, intrusion detection, duress and cell door-locking systems at a new Middlesex County courthouse in Woburn.
