

FOR IMMEDIATE RELEASE

SIGNET Acquires Telecom Portion of IDeACOM

Customers to Benefit From More Services; IDeACOM to Focus on Network Consulting

NORWELL, MA – Tuesday, May 27, 2008 – SIGNET Electronic Systems, Inc. today acquired the telecommunications technology portion of the Stratham, N.H.- based IDeACOM Integrated Technologies, Inc. The asset purchase agreement allows SIGNET, the largest privately held communications, security and life-safety systems solution provider in New England, to expand on its existing customer base in northern New England.

“In acquiring the telecommunications portion of IDeACOM's business, SIGNET will bring its customers the same dependable, 24-hour service, experienced advice and quality solutions. In addition, those customers will now have access to a vast array of additional integrated services, including video surveillance, access control, intrusion, public address, nurse call and local area networking installations,” said Bradford S. Caron, Executive Vice President of SIGNET.

IDeACOM will expand its focus on its network consulting and management services business, assisting its customers in managing the opportunities and challenges posed by recent changes in northern New England's carrier network, most notably the switch from Verizon to FairPoint Communications Inc.

“In the past two years alone we have seen three major network services mergers and two technology shifts. This development allows IDeACOM Integrated Technologies to focus on the challenges and opportunities that each change brings while continuing to work with our customers who rely on us for our knowledge of their network design, our experience with all of the major providers in New England and our ability to create voice and data networks that are cost effective and provide effective disaster recovery options,” said Bradford Little, president of IDeACOM Integrated Technologies.

In addition to purchasing the voice communications portion of IDeACOM, SIGNET will also retain three IDeACOM telecommunication employees and will work closely with the IDeACOM staff in its NH office. SIGNET did not disclose the terms of the sale.

The purchase of IDeACOM telecommunications assets is the second acquisition by SIGNET in about two years. In February 2006, SIGNET acquired Executone of Rhode Island, a telecommunications company serving southern New England.

SIGNET designs, installs and services voice, video and data equipment integrated to work together to provide comprehensive communications, security and life-safety systems. SIGNET represents more than 300 innovative product lines and manufacturers. SIGNET has annual revenues of \$28 million and employs 140 people in offices in Norwell, Massachusetts, Scarborough, Maine, and East Providence, Rhode Island.
